

Student A

Find a partner and make sure you have either sheet A or B. Sit as far away from your partner as you can. Take turns dictating your text. Write down what your partner reads.

Thomas Edison

Thomas Edison went to school for only three months, but he loved books, had an excellent memory, and was very curious about everything. Although he was almost deaf, he had a remarkable energy and determination. He was a practical man who asked questions from his childhood to his death.

Write down below what your partner reads.

Now go back to your partner and think about the next question: What did you use to help you communicate across the room? There are three main things to think about!

Student B

Find a partner and make sure you have either sheet A or B. Sit as far away from your partner as you can. Take turns dictating your text. Write down what your partner reads.

Thomas Edison

How did Thomas Edison make over one thousand inventions? He often worked twenty hours a day and stopped only for short naps. He ate irregular meals, drank too much coffee and smoked too many cigars. Despite this he lived actively to the age of eighty four.

Student B. Write down below what your partner reads.

Now go back to your partner and think about the next question: what did you use to help you communicate across the room? There are three main things to think about!
